

## Function Block 188 Load Indicator

---

### Function Description

This function block will supply an indication of system load by giving the duration of the task loop in mSec. A value of 100 should be considered as maximum.

### Popup Parameters

Execution sequence number.

### Input/Output and Parameters

Type	Description	Data Type	Range
Output	Task loop duration in nSec.	Byte	0 – 255

### Application

Monitor VPS\_P18 system loading.

### Notes:

Values greater than 70 should be avoided because your system will lack responsiveness to input and output signals.
