

Maximum distance between transmitters and receiver 25m

## AIM

To produce a wireless system that will allow up to 8 handheld pushbutton devices to transmit a specific momentary keystroke to a receiver which can be replicated on the screen of a laptop.

The system must be able to receive simultaneous signals from a maximum of 8 handheld devices.

Each handheld device must be able to send a unique and compatible keystroke to the receiver/laptop (i.e. Alt + 1 etc)
