Note) L : Distance to reflective object.

*1 Using reflective object : White paper (Made by Kodak Co. Ltd. gray cards R-27 : white face, reflective ratio ; 90%).

*2 We ship the device after the following adjustment : Output switching distance L=24cm±3cm must be measured by the sensor.

*3 Distance measuring range of the optical sensor system.

*4 Output switching has a hysteresis width. The distance specified by V_O should be the one with which the output L switches to the output H.
