Y-E DATA announces the release of Ultra-Wideband (UWB)

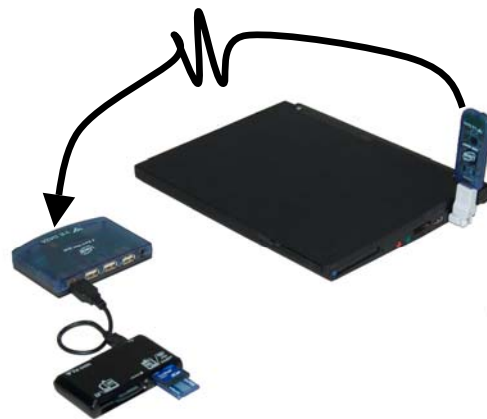

Wireless Hub , YD-300

Saitama, Japan, August, 29, 2006 -- Y-E DATA, Inc. (Headquarters: 182 Shinkoh, Iruma-shi, Saitama, representative director president, Mr.Kaneyuki Hamada) announced the development of ' UWB Wireless Hub, YD-300 ', in collaboration with Wisair. The 'UWB Wireless Hub, YD-300 ' will be available for the market in October, 2006.

The YD-300 consists of a host-dongle and a wireless hub with 4 USB ports. It provides the wireless transmission of data between a PC and existing wired USB devices such as HDD, DVD, mouse, keyboard, printer, digital camera and so on. The YD-300, by eliminating cables, frees up space around the PC with wireless technology and ensures a comfortable environment for PC users. In addition, this solution enables a wireless port-replicator with ease for notebook-type PC.

Host Dongle & Wireless Hub

Key Features

- Up to 480 Mbps air data rates
- Up to 10 meters operating distance
- Compatible with Windows XP
- 4 USB port hub
- Host Dongle: 29.8(W), 96.2(D), 9.4(H) mm
- Hub: 103(W), 79.5(D), 19(H) mm

In the near future, Y-E DATA will provide solutions with the 'Certified Wireless USB' technology of USB Implementers Forum, Inc., as well as PCI Express interface solutions. These will include, for instance, an ExpressCard/34 host card and PCI Express Mini Card, to expand the possibilities of wireless technology.

Open price

Mass Production: October, 2006

Certified Wireless USB products: TBD

About Certified Wireless USB

Certified Wireless USB, as announced by USB Implementers Forum (USB-IF), is the first high-speed wireless personal interconnect technology combining the speed and security of wired Hi-Speed USB with the ease-of-use of wireless technology. Certified Wireless USB is based on the WiMedia Alliance ultra-wideband common radio platform and delivers a bandwidth of up to 480Mbps at 3 meters and 110Mbps at 10 meters.
