

DOMETIC® RC4000 REFRIGERATORS

Life on the go is so much easier with an RC4000 portable refrigerator. A retractable handle and heavy-duty wheels make this fridge easy to tote off to the game, over to the neighbors or down to the fishing pond.

Lightweight, Compact Construction

Weighing in at only 35 pounds, this fridge can hold up to eight two-liter bottles. Carrying handles and a retractable handle are integrated into the frame for easy transportation. The hermetically sealed lid keeps inside items cooled properly. An outside storage net holds personal items securely in place for easy toting.

Efficient Performance

The absorption system in this refrigerator cools just like standard kitchen models. Cold air flows over, under and around food items, creating ideal storage conditions. Plus, it's quiet – no clicking, humming or noisy compressor to spoil a tranquil moment.

RC4000 Features

Performance on Wheels

110V, 12V or LP gas models give RVers the choices they need.

Absorption cooling system operates efficiently.

Integrated carrying handles and retractable handle last through years of use.

Tough, durable wheels make toting easy.

Hermetically sealed lid keeps interior properly cooled.

Outside storage net holds personal items securely.

Superior Warranty
