

## Electric Solenoid Valve

These 12-Volt DC electric solenoid valves with barbed inlet and outlet ports are great for projects! These types of valves are often used for automatic faucets, foot operated faucets, drinking fountains etc. However, they work great for almost any project requiring a 3/4" solenoid valve.

## Technical Specifications

Working voltage	DC12V
Maximum current	450 mA
Operating Mode	Normally Closed (Valve opens when energized)
Inlet/Outlet Ports	external diameter 3/4"(19mm)
Weight	103 g
Materials	Nylon/ Stainless Steel/Polyoxymethylene
Value Type	Diaphragm Valve (Servo operated)
Filter Screen	Stainless Steel Inlet Filter
Suitable Media	Water, Very Low Viscosity Fluids
Temperature Limitations	Maximum Fluid Temperature 120°C
Valve Response Time	Fast Acting
Pressure	0.02~0.8MPa
Estimated Valve Life	More than 200,000 Cycles
